

Curtis L. Boyd, MPA
Assistant Section Chief, MMIS Section
Louisiana Department of Health and Hospitals

Curtis Boyd currently serves as Assistant Section Chief for Louisiana's Department of Health & Hospitals, Medicaid Management Information System (MMIS) / MARS Unit. Curtis has 10 years of state government experience in health information and Data Warehouse Management. Curtis provides administrative leadership and direction in on-going development of strategic and operational plans. His expertise in developing technological solutions to improve business processes led him to put into operation several initiatives that focused on improving the system effectiveness and operations. He is responsible for state developed and state owned applications such as the MMIS Call Tracking Systems, Medicaid Project Development System, Uncompensated Care Invoice Tracking System, and Mediplex Report Builder. Curtis continues to promote and develop initiatives, as he is currently working on a Medicaid Emergency Tracking System. In recognition of his efforts in developing efficient and cost-effective new process for LA DHH/BHSF/MMIS, Curtis received the Innovator Award given by the national on-line publication *SearchWin200.com*.
